TOOLS NEEDED

5/32 = 4mm

1 Install your light, adapter or box onto the light bar by following the instructions that came with the optional accessory.
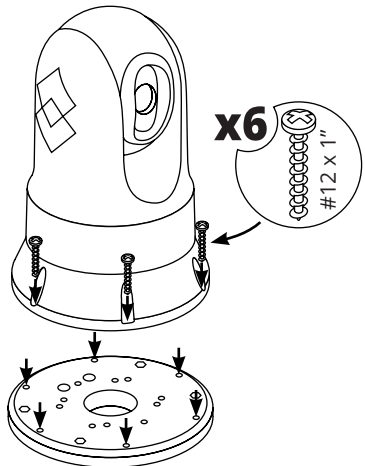

**2** Insert the four nuts into the adapter plate. This has most likely been done for you.

3A Using a philips head screwdriver screw in the six #12x1" screws to secure the camera to the adapter plate. **(For #LTB-SF2 only)**
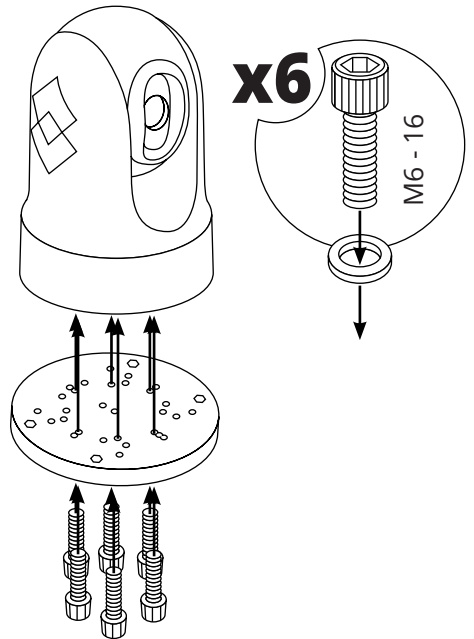

x6

#12 x 1"

3B

Secure the camera or search light assembly to the light bar using the four 1/4-20x1" bolts and nylon shoulder washers.

x4

1/4-20x1"
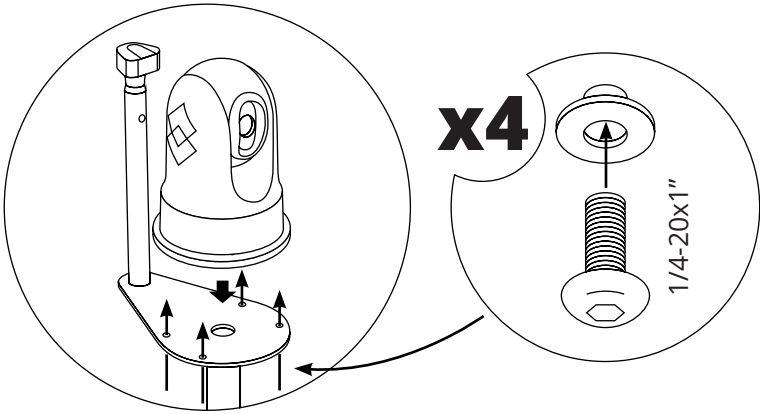

4A

Using a philips head screwdriver screw in the six M6 - 16mm bolts to secure the camera to the adapter plate. **(For #LTB-SF only)**

x6

M6 - 16

4B

Secure the camera or search light assembly to the light bar using the four 1/4-20x1" bolts and nylon shoulder washers.
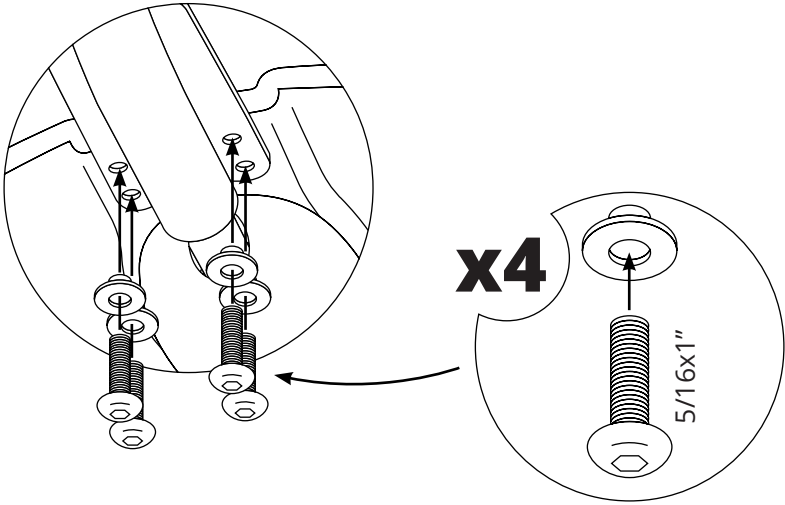

x4

1/4-20x1"

5

Insert the light bar into the light bar hole located on the back of the Seaview mount.

6A Using the four 5/16x1" bolts and nylon shoulder washers, secure the light bar by bolting it to the top plate.

x4

5/16x1"

6B When using the Seaview #SP1-MOD or #SP2-MOD Spreader Kits use the 5/16x2-1/2" bolts.
