

# RX72000 - Stainless Steel Rigging Kit Instructions

Thank you for choosing Reelax, proudly Australian Manufactured & Owned.

## Assemble Rigging Kit In Order:

1. Install bolts and eye nuts supplied finger tight through poles, recommended to use Tef-Gel or thread locker such as Loctite to hold in place.

**Note: Do not overtighten eye bolts as can stress fracture poles & may cause breakage upon load/use.**

2. Attach top shackle and pulley to top eye nut.

3. Lay snubber line next to bottom of pole.

4. Run mono main line through snubber pulley, up through eye nuts, and through top pulley.

5. Loop and crimp mono through top snap swivel.

6. Clip quick release clip on to top snap swivel.

7. Clip snap swivel to lower eye of quick release clip.

8. Run mono main line through bottom eye of lower snap swivel.

9. Adjust mono to desired length when poles are deployed / stowed then crimp to fix.

10. Fasten saddles / eye straps using screws supplied at desired position/s on boat for snubber line.

## RX72000 Kit Includes:
